FastQC Report

Summary

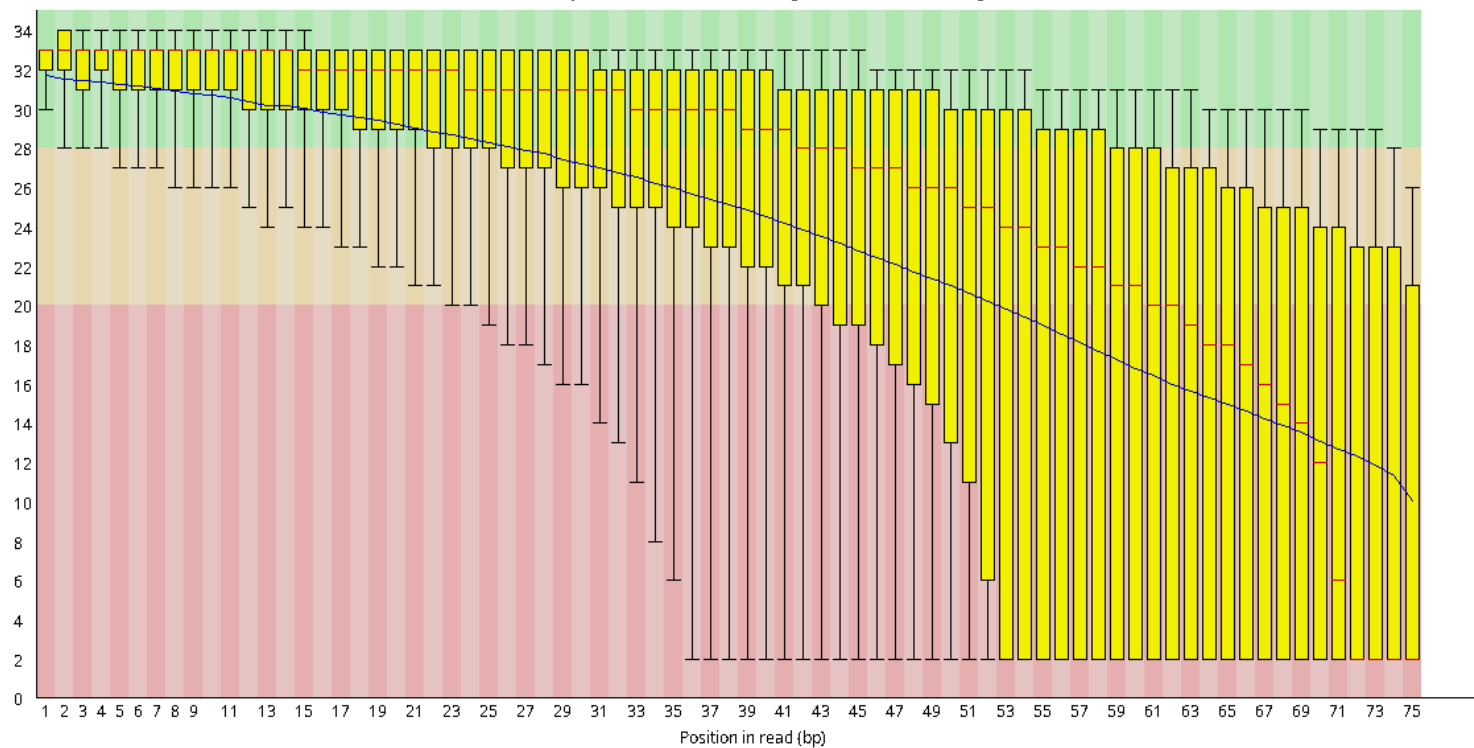

-  [Basic Statistics](#)
-  [Per base sequence quality](#)
-  [Per tile sequence quality](#)
-  [Per sequence quality scores](#)
-  [Per base sequence content](#)
-  [Per sequence GC content](#)
-  [Per base N content](#)
-  [Sequence Length Distribution](#)
-  [Sequence Duplication Levels](#)
-  [Overrepresented sequences](#)
-  [Adapter Content](#)

Basic Statistics

Measure	Value
Filename	reverse.gz
File type	Conventional base calls
Encoding	Sanger / Illumina 1.9
Total Sequences	20531102
Total Bases	1.5 Gbp
Sequences flagged as poor quality	0
Sequence length	75
%GC	47

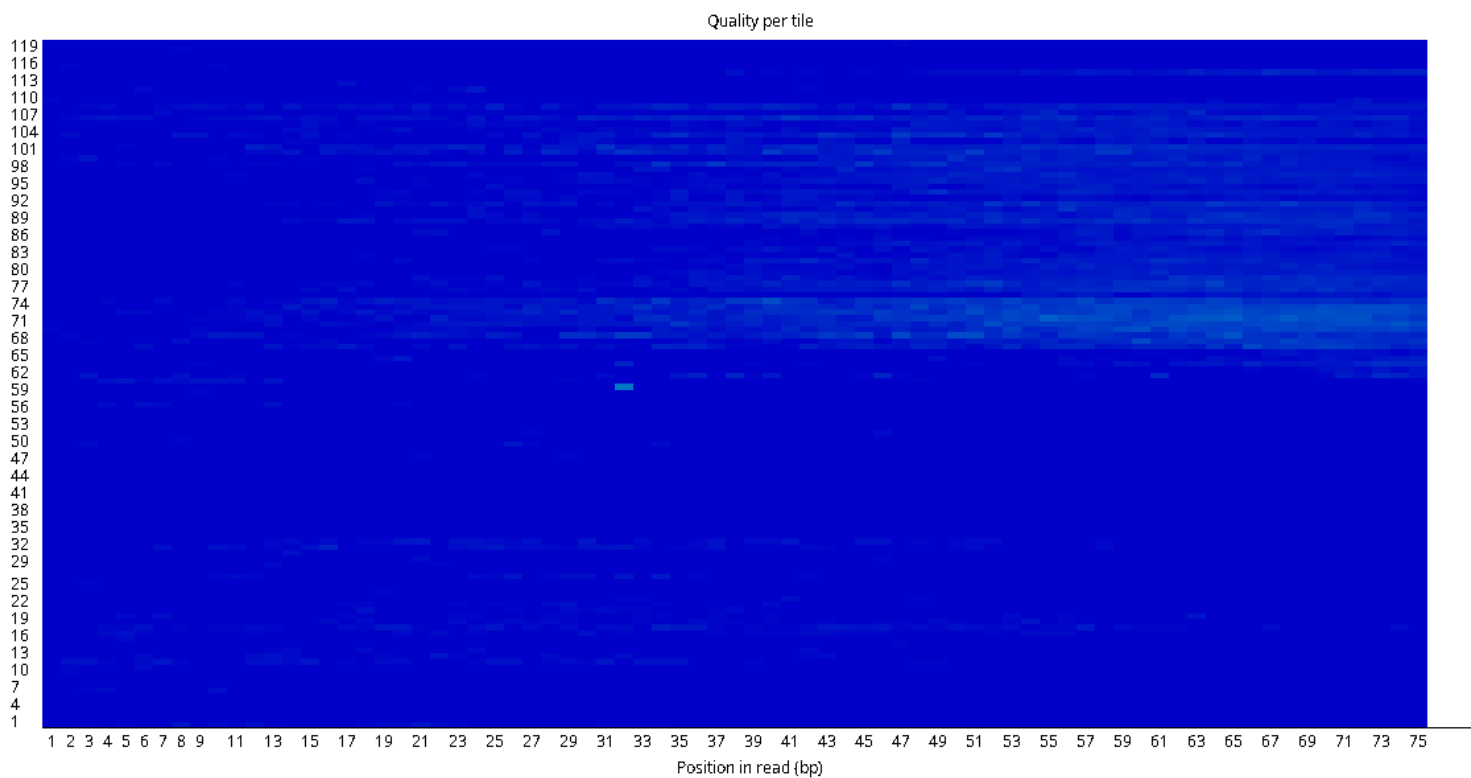

✖ Per base sequence quality

Quality scores across all bases (Sanger / Illumina 1.9 encoding)

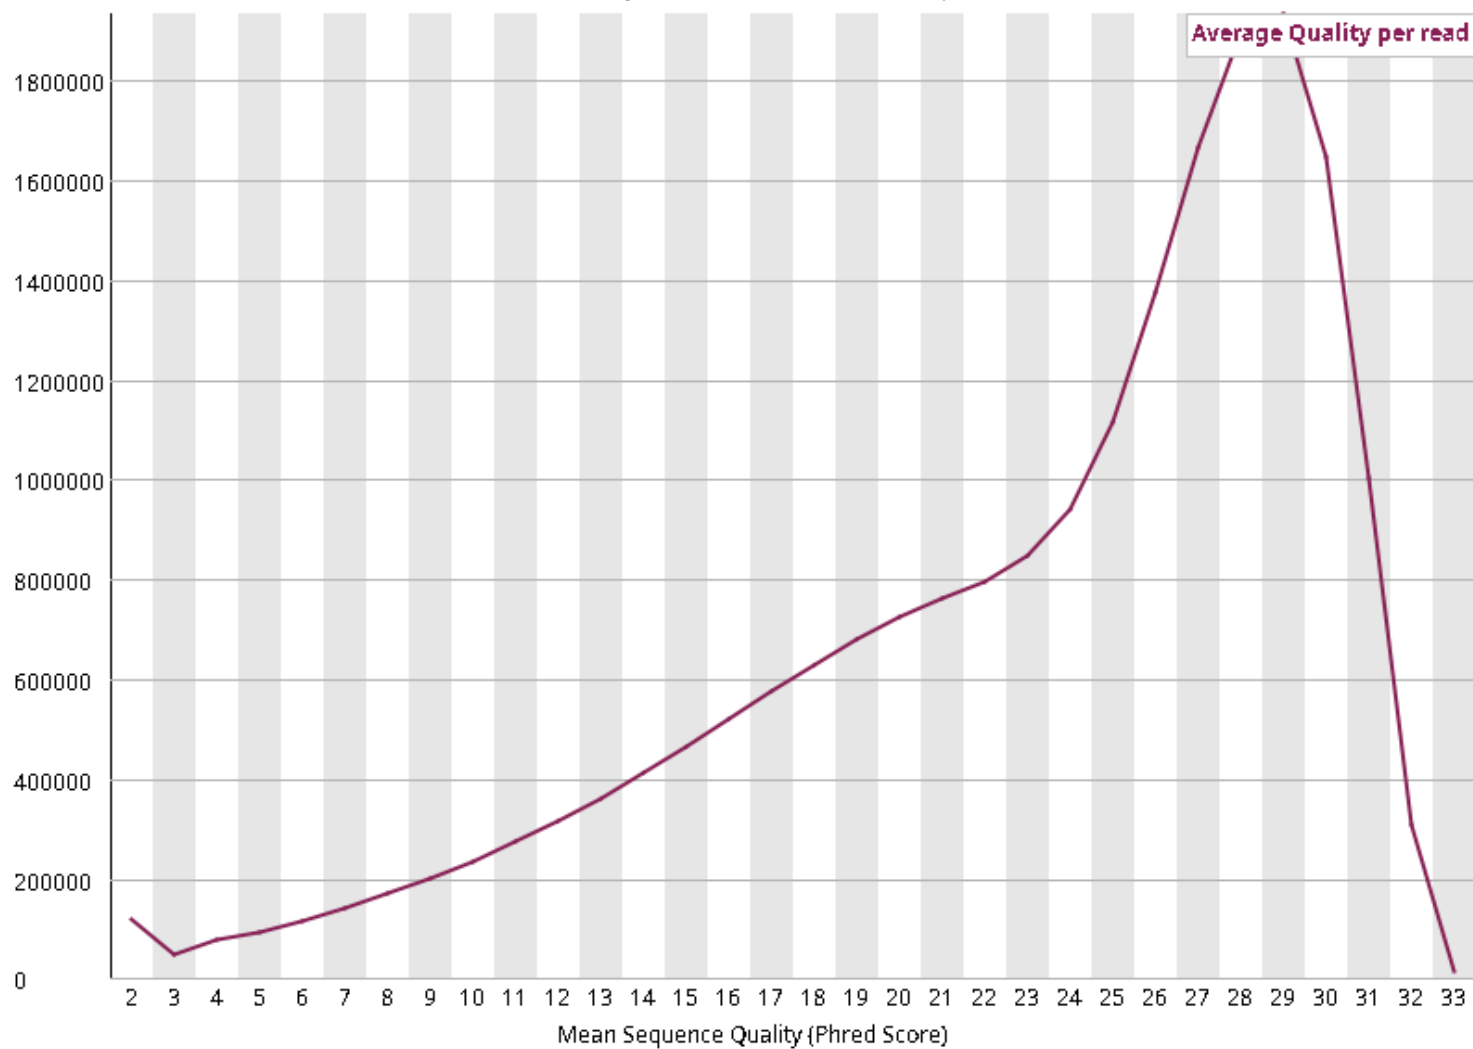

Per tile sequence quality

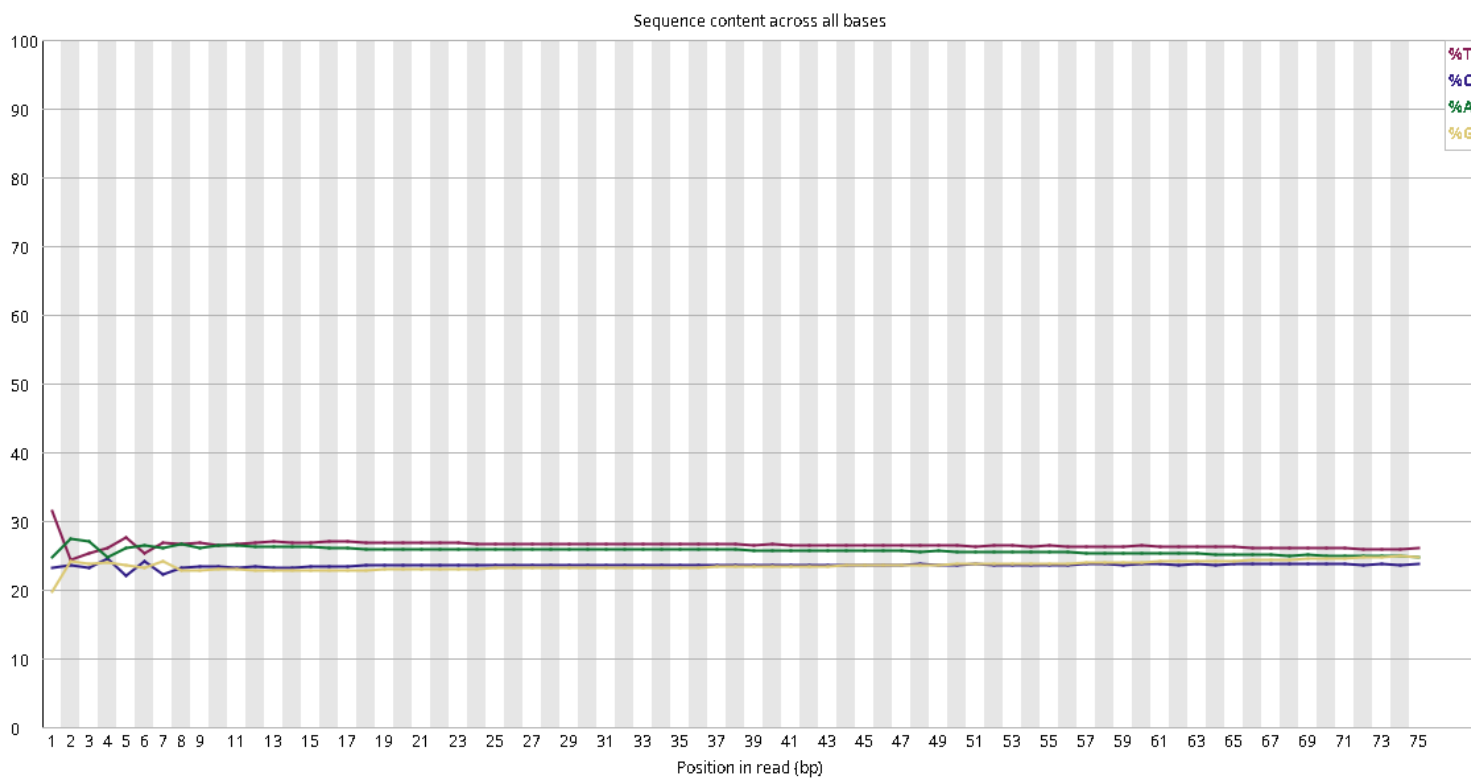

✓ Per sequence quality scores

Quality score distribution over all sequences

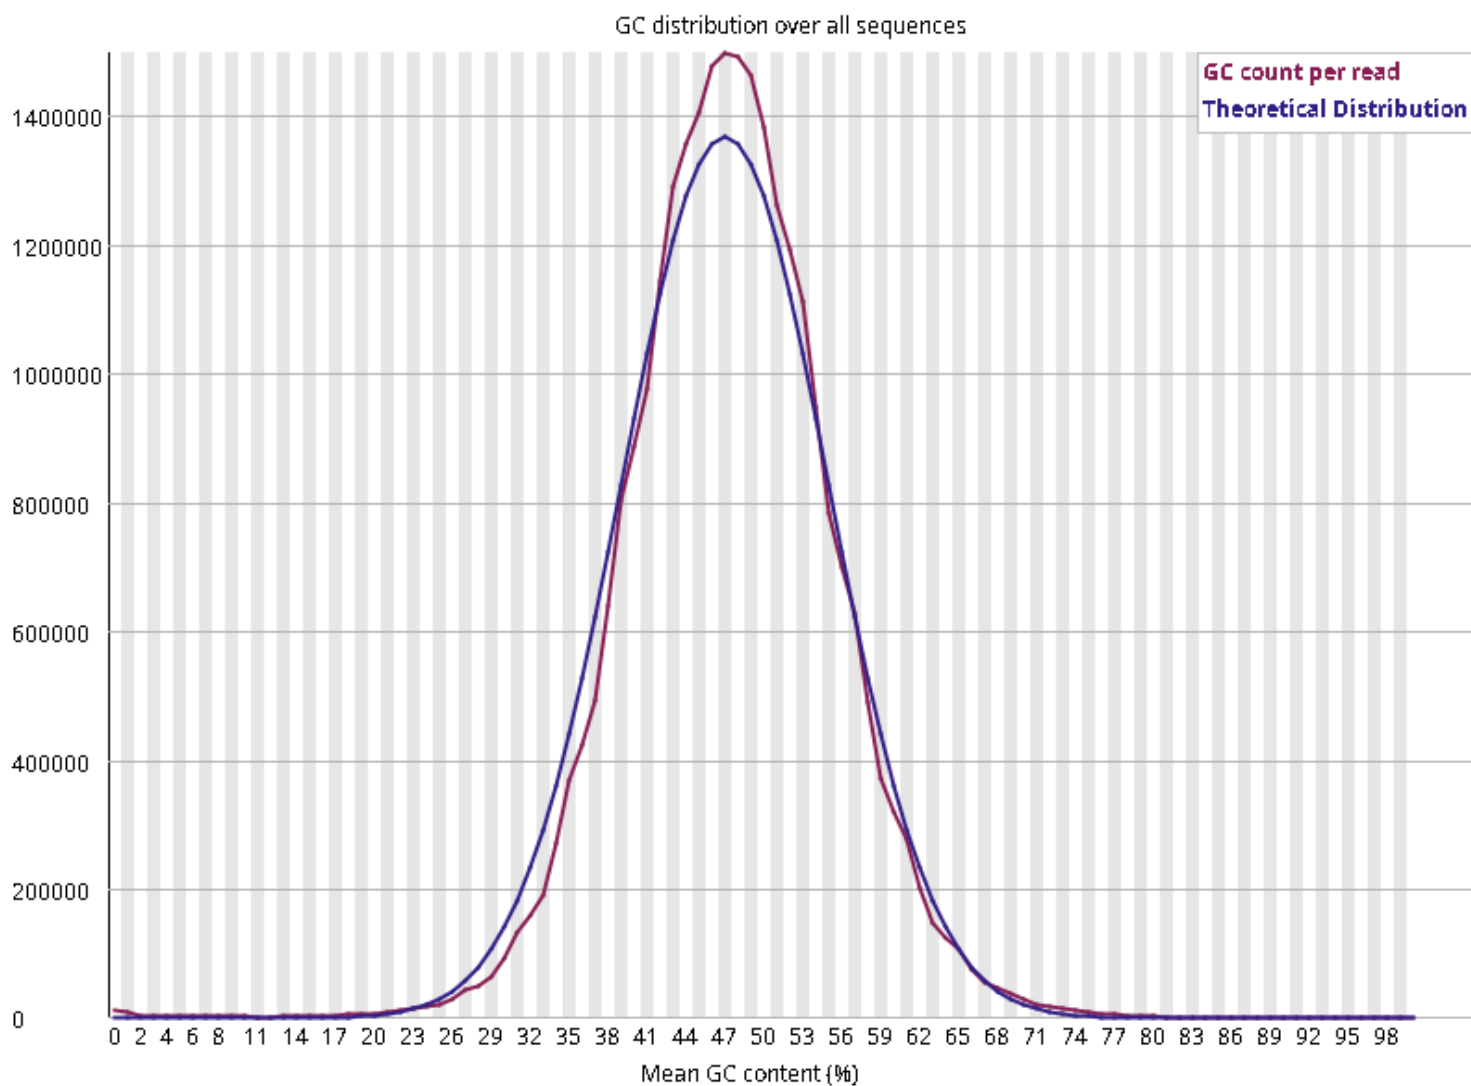

Per base sequence content

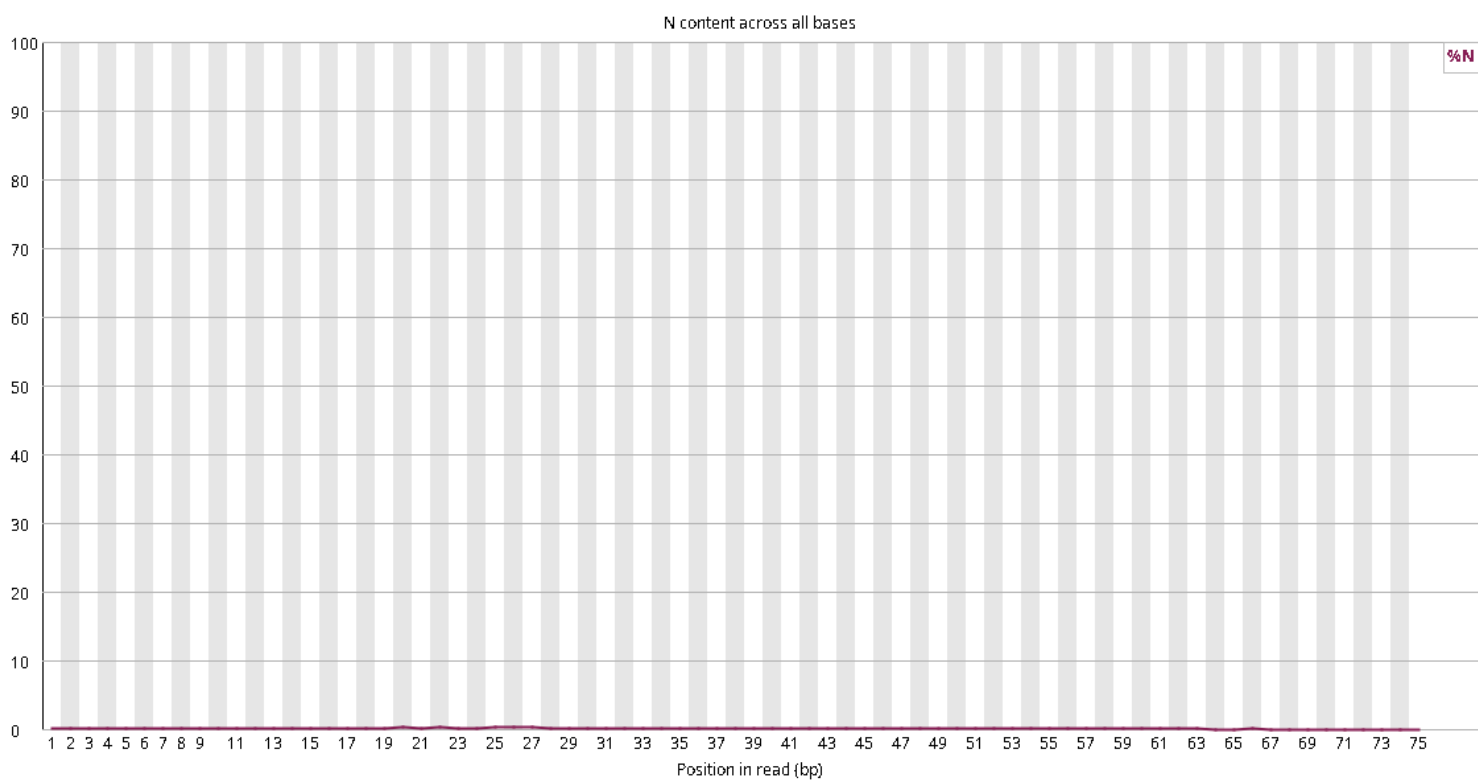

✓ Per sequence GC content

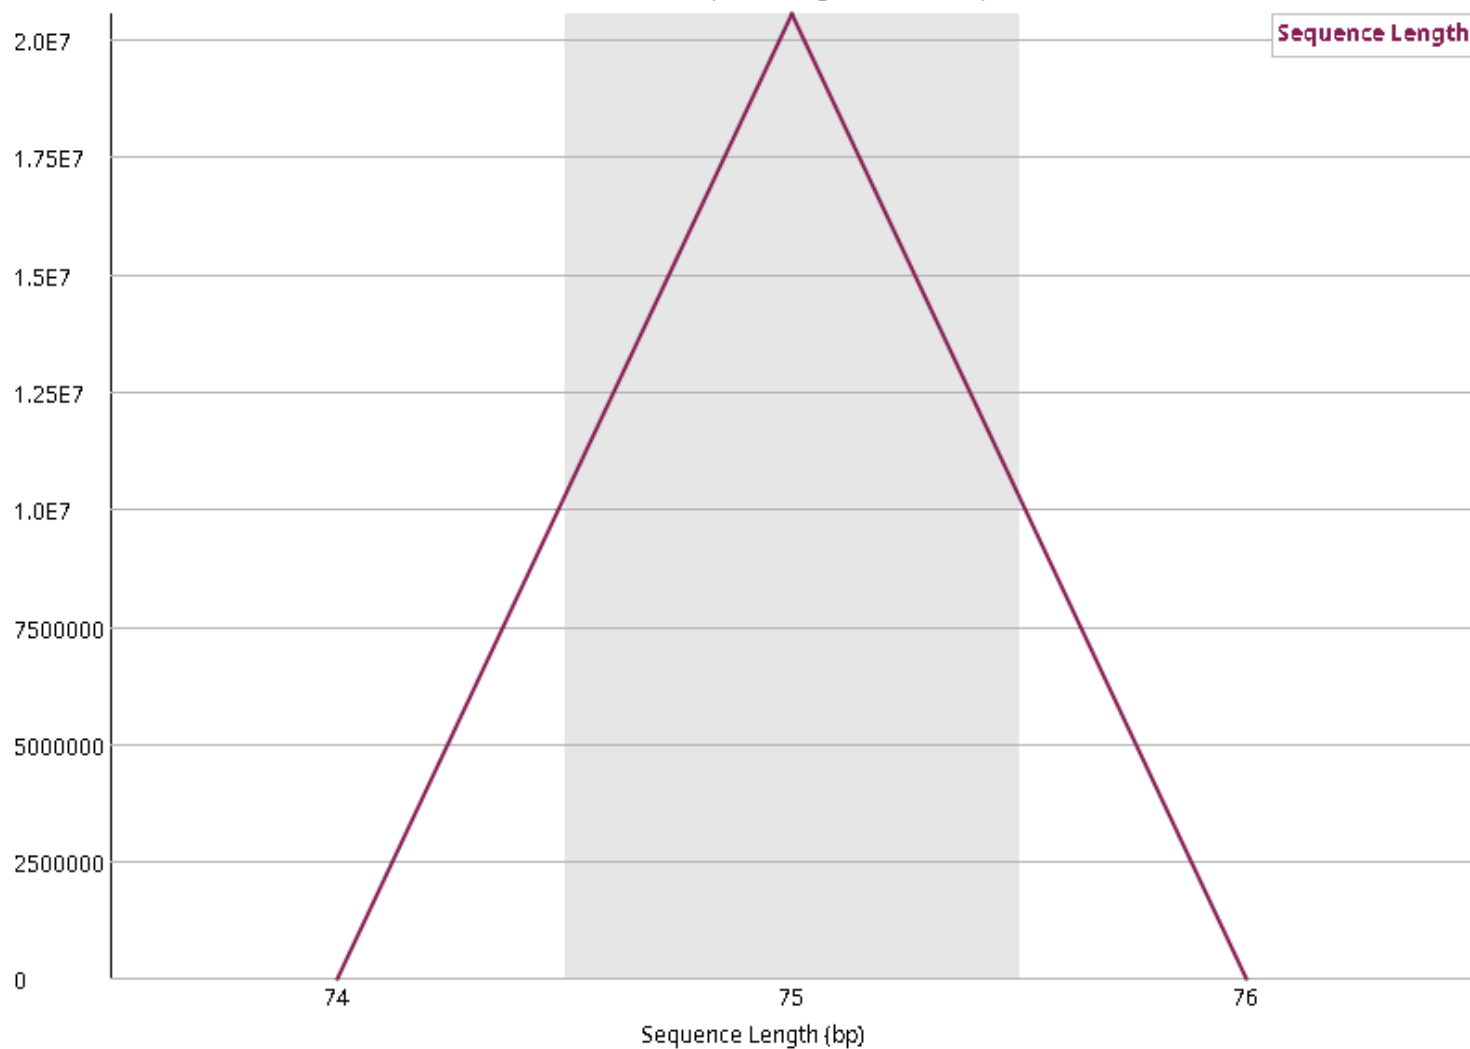

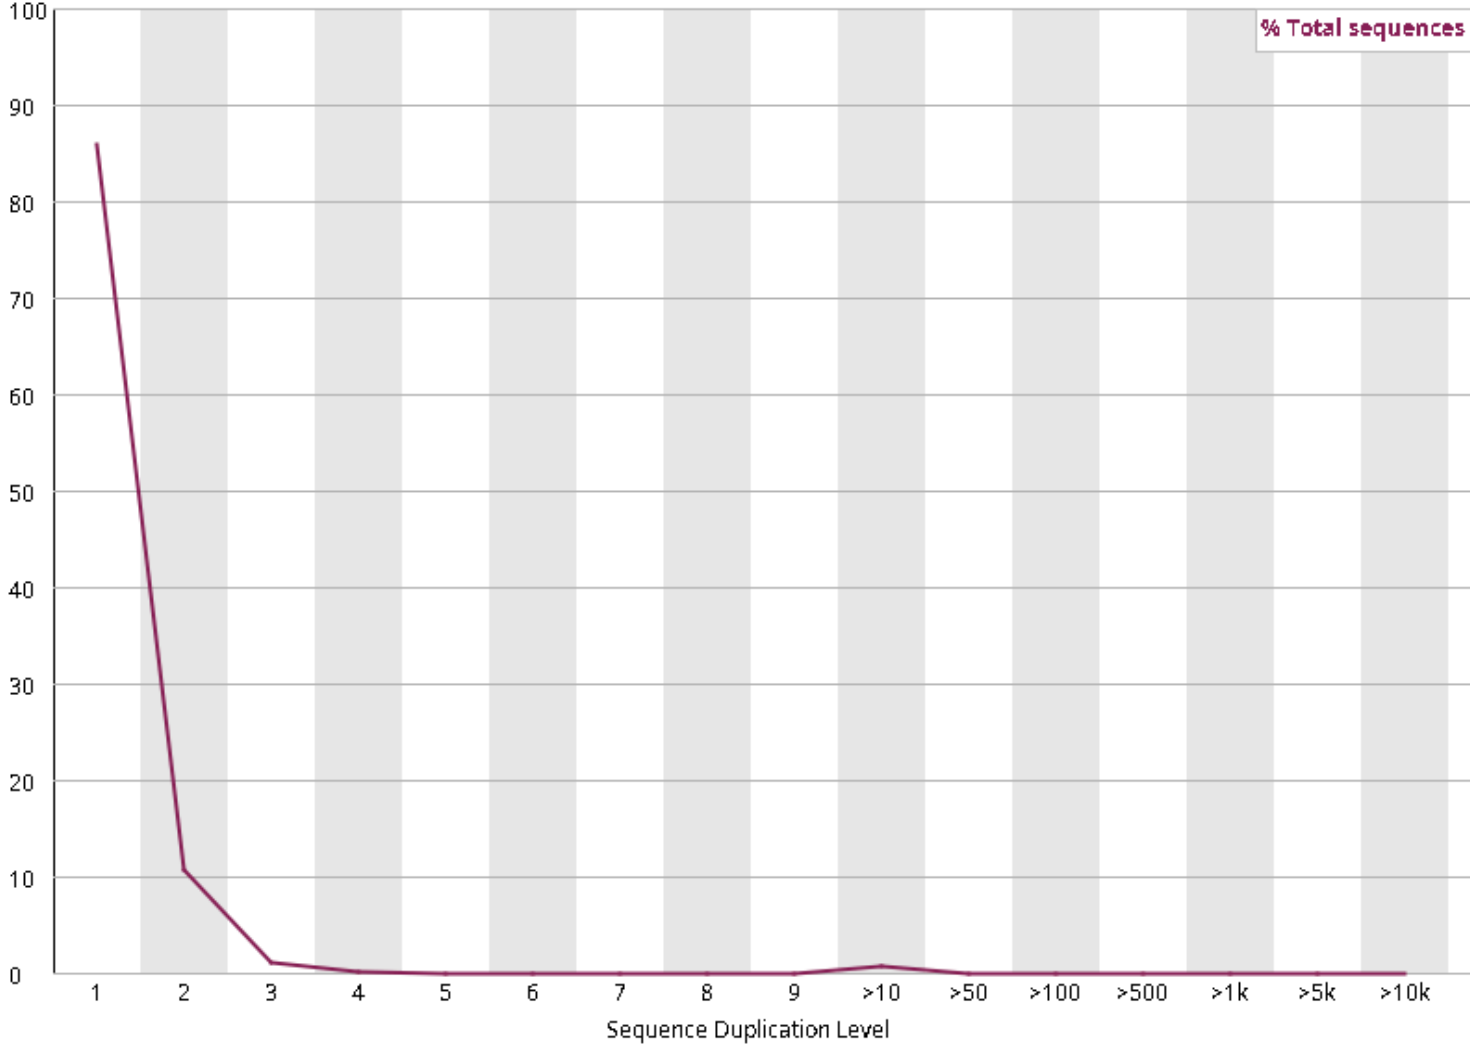

Per base N content

Sequence Length Distribution

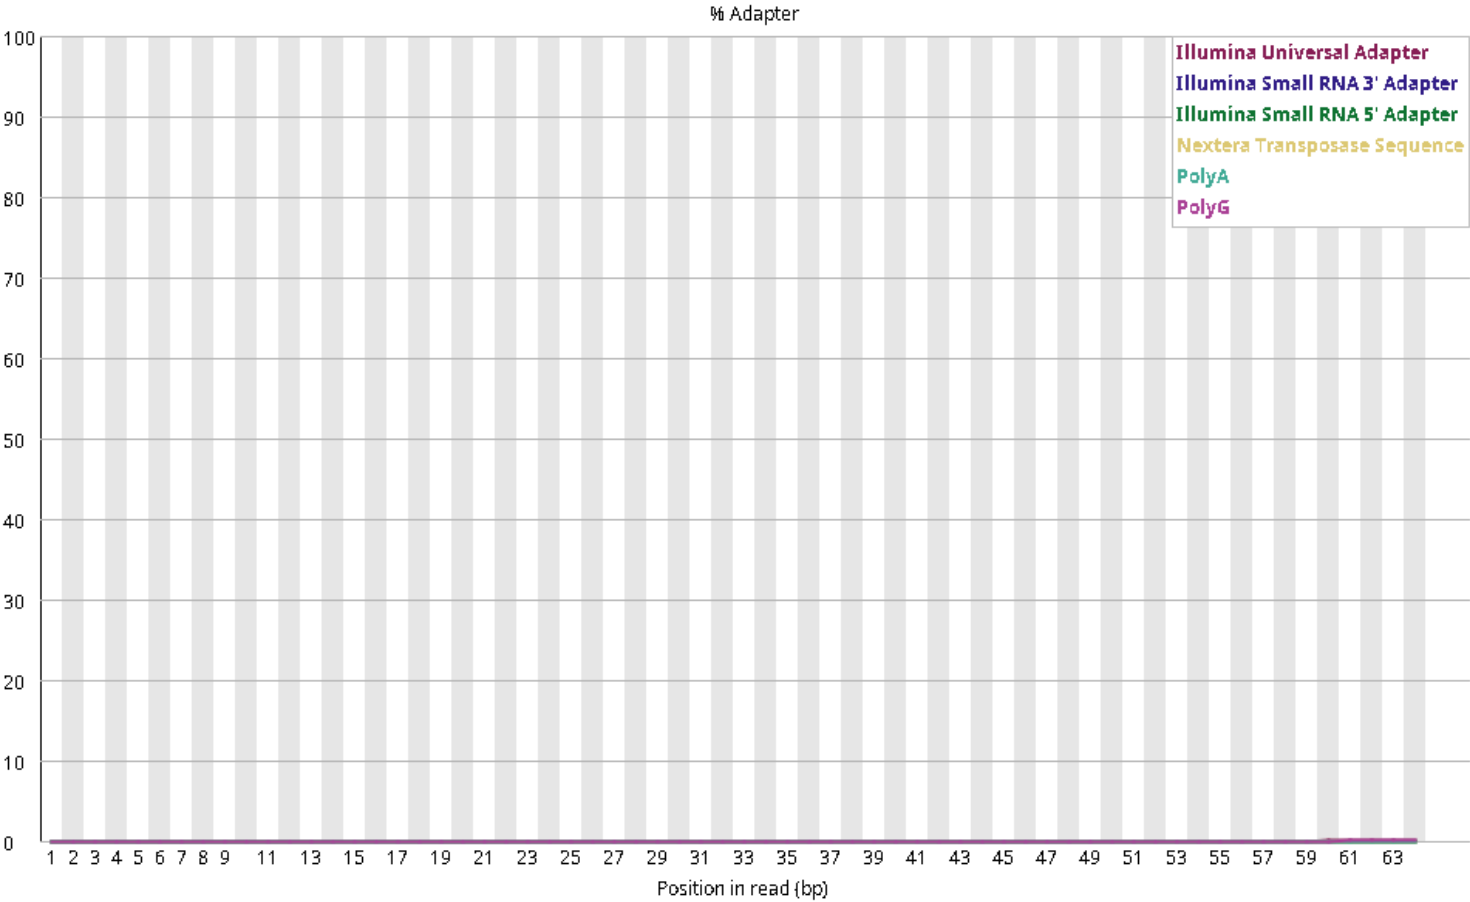

Distribution of sequence lengths over all sequences

[illegible]

Adapter Content

Produced by [FastQC](#) (version 0.12.1)
